NOTICE OF RAW MATERIAL UPDATE FOR BONE CHINA
(EGGSHELL-DERIVED CALCIUM)

Dear Valued Customer,

We hope this message finds you well.
Thank you for your continued support of our products.

As part of our commitment to sustainable manufacturing,
we have developed an upcycled material using eggshell byproducts.

Accordingly, for our bone china products, the limestone previously used in the raw material
will be replaced with calcium derived from eggshells, resulting in a more environmentally conscious bone china body.

Please rest assured that this change will not affect the quality of our bone china,
including whiteness, translucency, or strength.

We apologize for the short notice.
The transition to the new raw material will be implemented in stages, and we appreciate your understanding.

If you have any questions, please let us know.

We sincerely appreciate your continued business.

Sincerely yours,

Takashi Nakai
